

THE ART OF

Time Living

A magnum opus set across 56 acres

By Rohan

This special edition
is exclusively for sale in Pune

Dedicated to you.

Acknowledgements

One of the wonderful things about living the good life is that you are pampered for choice. Which is just the case, at Rohan Mithila. We offer you spacious apartments,

luxurious row houses, beautiful duplex homes and, of course, what's the good life without a few penthouses!

Rohan Mithila is by far our grandest endeavour yet.
This epic project was realized to its fullest potential
with the encouragement and support of:

- 15 years of experience in creating architectural landmarks
- 400 highly experienced Civil Engineers
- 80 landmark projects, from Uttaranchal to Pondicherry, Meghalaya to Mumbai
- A CRISIL Rating of DA2 held consistently for the last four years
- A diversified group, with operations in civil engineering, real estate development, infrastructure, agriculture and IT.

has its Pluses ▶

Plus Homes

What makes the good life much sought after?
At Rohan Mithila, we believe it has to do with
the benefits that our luxurious homes offer. All our
landmarks are created around four pillars

of Perfect Ventilation, Lively Light, Utmost Privacy
and Smart Spaces. Also known as PLUS homes.

Perfect ventilation is created with efficient cross ventilation. The doors and windows have been aligned to let in a steady stream of air. This ensures sufficient air flow around your home, and also keeps the air inside fresh at all times.

At Rohan, we understand light does not penetrate more than twenty feet from one source. Based on this premise, all our designs feature large windows and more openings. The way we've planned our home, absolutely nothing can stop the passage of light. We've done away with the unwanted walls and passages, making sure that natural light is unobstructed. You'll never feel the need to use artificial light when the sun's still up. Utmost privacy is also maintained, at Rohan Mithila, by ensuring that the distance between two rows of

multi-storeyed buildings is in the range of 160-200 feet. At Rohan, the unique design ensures that your windows do not open directly into neighbouring windows. In fact, even the walkways around the residences have been created at a lower level to ensure maximum privacy for all homes.

One of the parameters of fine architectural design is the smart use of space. For example, the living room and the dining area are perpendicular to each other, with the living area in a ratio of 1:1.5, to create a spacious ambience. All our designs are subjected to stringent tests on this count. To ensure that space within a home can be utilized to maximum effect. So you can make the most of your living space, at Rohan Mithila.

Homes that spoil you_____

for choice▶

One of the wonderful things about living the good life is that you are pampered for choice. Which is just the case, at Rohan Mithila. We offer you spacious apartments,

luxurious row houses, beautiful duplex homes and, of course, what's the good life without a few penthouses!

The apartments at Rohan Mithila, like all our other projects, have been designed in keeping with our philosophy of PLUS homes. It emphasizes on ample ventilation, natural lighting, privacy and efficient spaces. Spaces are just not connected physically but visually as well. So our 1, 2 and 3 bedroom apartments are designed in keeping with this philosophy, to create a fine blend of beauty and tranquility within every home.

Our row houses are designed to create a wonderful ambience of spaciousness.

Rohan Mithila offers you open homes designed with minimal walls to create a very spacious and airy ambience. Our row houses are in fact 'breathing' homes with constant circulation of fresh air at all times, with efficient cross ventilation. Despite the minimal number of walls, privacy is maintained with the creation of different floor levels. Inspired by 'Vaada', the ancient Maharashtrian concept of architecture, there is a courtyard at the centre of the house, with rooms located around it. This lights up the entire house with natural light.

Duplex home

Section view

Our duplex homes are ‘double height’ living spaces with an ambience of refreshing spaciousness. Every duplex home boasts of spacious rooms that are well-ventilated and illuminated by natural lighting. The living room on the lower level opens into a beautiful terrace garden, which can be seen from the bedroom on the second level.

What’s more, the design creates the ambience of an independent home. The entire house is visually connected by double height volumes. In fact, the upper level seamlessly connects with the lower level due to the presence of many windows and decks. The double height deck space forms the hub of the

house. At the lower level, the living room and the bedroom open to the deck. On the upper level, the two bedrooms overlook the landscaped deck.

The penthouses at Rohan Mithila are designed with three spacious bedrooms and a beautiful terrace. Here again, every penthouse has a wonderful courtyard at the centre of the house, allowing for sunshine to stream in and light up your home. There is also ample cross ventilation, to ensure fresh air supply at all times. An internal staircase takes you to the private terrace garden treating you to a beautiful view of the city.

The Landscape

- your very own tranquility base ▶

At Rohan Mithila, the landscape derives inspiration from the abstract paintings of the modern masters, Wasily Kandinsky and Piet Mondrian. It is a picturesque composition of intersecting and overlapping lines and planes in three dimensions that create a variety of spaces. The outdoor facilities are an extension of the indoor living spaces. Each has a specific function and purpose, whether it is a children's playground, a party lawn, a yoga deck, a swimming pool, or an entrance plaza. The geometric lines and planes are subtly expressed by water elements

such as reflecting pools, swimming pools, water troughs and water walls; hardscape such as timber decks, stone paved plazas and courtyards, pathways, trellis and feature walls; and greenery such as open lawns, amphitheatres, avenues of trees and palms, bosques of trees and flower beds. Viewed in totality, more than 13 acres of landscape paint a picture of quiet elegance and sophistication, a timeless expression that will evolve and mature over time.

Moksha for
gadget geeks ▶

One of the pleasures of the good life is maximized convenience every step of the way. At Rohan Mithila, our digital homes are designed precisely to fulfill this endeavour. With cutting edge technology that puts every facility at your fingertips, even when you are not at home. Remain connected with your home at all times via Internet and mobile from anywhere in the world. Sounds like science fiction? Well, consider this: you can watch a clip of your visitor at home from your office PC or even on mobile via MMS. If you have forgotten to activate your home security system just send an SMS to turn it on. If you are at the movies, worried about whether you've turned off the LPG, simply switch it off via your mobile phone! Our digital homes are sensitive to the needs of senior citizens, as well. Present our emergency pendant to an aged person at home.

In case of an emergency, all she/he needs to do is press the pendant. You, along with our security personnel, will be notified immediately on your mobile phone. Then there are, of course, the mandatory security and safety features, the smart sensors will ensure home security 24X7, in stay and away mode. For your safety, smoke detectors and LPG leak detectors will alert neighbours, security persons and house owner through SMS and/or phone call. Moreover, you can do a lot using an intelligent touch screen LCD: use it to screen visitors, receive all society communication related to meetings, memos and even login your maintenance complaints for instant service, or order pizza online. There are many more features you can explore with your digital home solution. So rest assured you can live the good and safe life at Rohan Mithila.

Caring for the
good earth▶

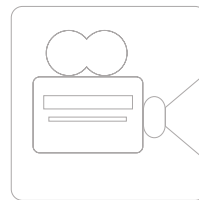

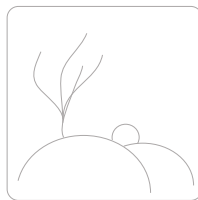

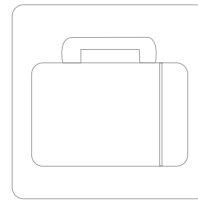

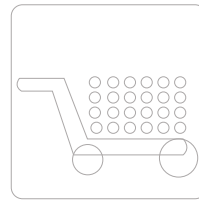

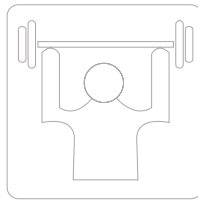

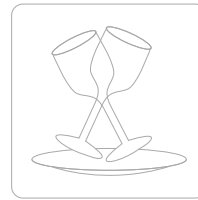

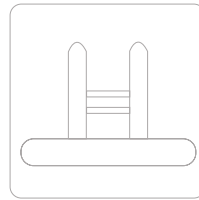

At Rohan Mithila, we believe living the good life also involves caring for the good earth. This follows from our endeavour to create ECO Homes. Which means creating world-class living spaces with minimal alteration to the environs. So we employ drip irrigation to prevent wastage of water. Rainwater harvesting and the use of fly ash for construction are mandatory in all our projects. Water recycling and sewage treatment facilities are present to minimize water wastage. Energy is recycled in every manner possible. For example, we have a biogas plant to process wet garbage to produce fertilizers which are used in the lush green gardens. In other words, we try to create a mini biosphere so as to preserve the natural eco-system of the region. Paradise, after all, deserves to be protected.

CRISIL Rating - DA2

It's undoubtedly the grandest effort by the authors of such architectural best sellers like Rohan Jharoka, Rohan Madhuban and Rohan Leher. And this time, they've gone further than ever before. Rohan Mithila is the largest project of Rohan Builders. And what a grand stage to set a magnum opus – 56 acres of pure paradise in beautiful Pune! With such a gripping plot, Rohan keeps you hooked as you turn page after page watching Eden unveil before your eyes. Clearly, the authors with an unmatched track record for architectural masterpieces have pulled off yet another winner!

“Rohan Aalia further consolidates their excellent track record in creating contemporary living spaces...”

Inside Outside

“Rohan pulls off yet another winner, on a scale never seen before.”

Architectural Digest
